## **EXPERIENCE**

Intel, Folsom, CA — *Software Engineer Intern*MAY 2017 - JAN 2018

- Debugged 2 high-priority parser issues that reduced compilation time by 15% (45 min) through algorithmic improvements.
- Optimized a few thousand lines of legacy code by migrating it to an object-oriented design with concurrency support in C++.

**Luminant**, Granbury, TX — *Electrical Engineer Intern*MAY 2016 - AUG 2016

 Developed a technical specification for an obsolete transformer by collaborating with 4 different engineering teams.

**Texas Petawatt**, Austin, TX — *Software Engineer Intern*JUNE 2015 - AUG 2015

- Upgraded a laser-capturing software to make it compatible with 4 new cameras by refactoring and reimplementing the camera API's.
- Eliminated ~0.5 hour of daily time-waste in pumping a vacuum chamber by automating the process in LabVIEW and adding new hardware.

#### **EDUCATION**

University of Texas, Austin, TX — B.S. in *Computer Engineering*AUG 2014 - MAY 2018 Major GPA: 3.41

**Collin College**, Plano, TX — **A.S. in** *Software Engineering*JAN 2012 - MAY 2014 Major GPA: 4.00

#### FEATURED PROJECTS

Face Blur — Personal Project (React, Node, Express, PostgreSQL)

• Reduced 68% (8.24s) of load time by lazy-loading routes, eliminating render blocking bundles in above-the-fold content, and minifying files.

**Augmented Audio** — *Academic Team Project* (Python, Unity)

- Won 2nd place among 13 teams using just over half of the budget (\$599).
- Implemented object detection using TensorFlow API's and the SSD model.

See-Through ADAS — Academic Honors Project (Python, Android)

• Devised an object-tracking algorithm with 95% accuracy in a 30 minute test drive by utilizing and training a convolutional neural net (74.7 mAP score).

Granular Synthesizer — Academic Project (C/C++)

- Optimized drawing speed on LCD up to 4x through caching pixel attributes.
- Increased sound-sampling size from 68KB to 120KB by compressing inputs.

# **SKILLS**

**Comfortable with:** OOP, FP, Algorithms, Data Structures, TDD, Agile, Design Patterns.

**Languages:** Java, JavaScript, Python, C++, SQL, HTML,CSS.

Front end: React, Android.

**Back end:** Node.js, Express, Flask, PostgreSQL, Git, Bash.

**System admin:** Ubuntu, AWS, Docker, Heroku.

**Testing:** Mockito, Jest, Mocha, TravisCI, TeamCity.

**ML/CV:** Keras, TensorFlow, OpenCV.

**Limited exposure:** MySQL, MongoDB, JQuery, Elixier.

### **AWARDS & HONORS**

Intel Employee Recognition by Manager and Product Owner in September 2017 & January 2018.

Academic Merit Scholarship recipient since August 2014.

Collin College President's List in Jan 2014.

**Collin College Dean's List** in May 2013.

**Phi Theta Kappa** honor society since August 2012.

#### LANGUAGES

Fluent in **English** and **Persian**.
